For the experienced therapist this text provides an aide memoire to the treatment and management options. It provides a vehicle for the integration of treatment and management protocols emanating from the various concepts and philosophies favoured by the different schools of thought in manual therapy practice whether student or clinician.

- Logical, repetitive structure from chapter to chapter
- Highly illustrated with specially commissioned photos and line drawings
- Written at a level suitable for undergraduate students in all the relevant specialties
- Well referenced, comprehensive and concise
- Written by two experienced teachers, researchers and clinicians who are aware of the need of students as well as of the realities of practice
- Brings together a summary of all the different schools of thought in the treatment of musculoskeletal conditions
